

Sector Group Committee Candidate

Ashley Levin

GENERAL CONTRACTING NOMINEE

Ashley Levin
Wolf Construction Australia

Over 30 years' experience in the construction industry commencing in the 1980's after graduating. I graduated from The University of Melbourne with a degree in building. My career after university commenced at a CBD site as a project co-ordinator. I worked my way up to CA, PM, CM and then Director. My experience spans large and small construction, civil, residential, commercial, institutional and mixed use.

I have had previous involvement with the General Contracting Sector Group Committee and found it as an effective way to engage and give something back to the industry. If elected, I will be keen to volunteer for one of the various subcommittees that worked hard to effect change for the betterment of all members. My years of experience coupled with my 'partnering' approach to management has resulted in being able to build an extensive network of contacts within the industry. I could mention the various accolades I've accumulated over my career; however, I prefer to focus on making a valuable contribution to the industry's future rather than to dwell on past successes.

As a person I am approachable, empathetic, and with a willingness to mentor or help others. My experience and attitude places me in a strong position to add value to the various processes that is involved with being part of the General Contracting Sector Group Committee.
