

# WAGE BULLETIN 2020

(From 1 November 2020)

**BUILDING AND CONSTRUCTION GENERAL ON-SITE AWARD 2010  
[MA000020]**

**This wage bulletin contains information about minimum wages and allowances under the Building and Construction General On-Site Award 2010 (the Award) applicable from the first full pay period commencing on or after 1 November 2020.**

## Update to this wage bulletin

This wage bulletin incorporates the 1.75% increase to the minimum wage rates under the Award in line with the Fair Work Commission's Annual Wage Review as well as a CPI adjustment to the expense related allowances. These minimum rates of pay are applicable from the first full pay period on or after 1 November 2020.

## How to use this wage bulletin

In order to identify an employee's applicable minimum rate of pay, you will first need to determine the industry in which work activities will be performed. This will be in either:

- I. the general building and construction industry, the civil construction industry, the metal and engineering industry (**non-residential work**); or
- II. the residential building and construction industry (**residential work**).

Where an employee does not perform residential work, the non-residential rates will apply.

As the industry allowance is an all-purpose allowance under the Award, it has been included in the rates outlined in this wage bulletin.

For further information on what residential work is, please see the key terms section of this wage bulletin.

## Structure of this wage bulletin

This wage bulletin is divided in three parts:

Part A - contains the rates of pay for the non-residential work (see page 3 onwards)

Part B - contains the rates of pay for the residential work (see page 6 onwards)

Part C - contains the allowances for both the residential and non-residential work (see page 9 onwards)

## Key terms

**Adult Apprentice** – an apprentice that is 21 years of age or older at the time of entering into a contract of training in a specified trade and reflect the Fair Work Commission Full Bench Decision.

**Apprentice** – an employee who is aged under 21 years of age at the time of entering into a contract of training in a specified trade.

**Daily hire** – an employee engaged under the Award that receives or provides one day’s notice on termination. To compensate for the lack of employment security, daily hire employees receive a higher hourly rate. All other allowances and entitlements are the same for daily hire employees under the Award.

**Weekly hire** – a full-time or part-time employee engaged under the Award that receives or provides notice depending on their length of continuous service with the employer. These notice requirements are set by the National Employment Standards (NES), which is reflected in clause 16.1 of the Award.

**Non-residential work** – the non-residential industry refers to the general building and construction industry, the civil construction industry and the metal and engineering construction industry. For further information, please see clause 4.10 of the Award.

**Residential work** – the residential work refers to residential building and construction industry as defined by clause 21.2(b) of the Award. This involves work activities undertaken in relation to single occupancy or dual occupancy residential buildings which is not a multistorey building, which consists of five or more storey levels on completion.

## Important things to remember

At the time of engagement, an employer must inform an employee in writing about the nature and terms of employment, such as whether the employee will be engaged as a daily hire, full-time or part-time weekly hire or casual employee.

Where an employer is required to make contributions under Superannuation Guarantee legislation, the current minimum contribution is 9.5% of the employee’s Ordinary Time Earnings.

For more information, you can contact the MBV IR Team on (03) 9411 4555.

Whilst all care has been taken in the preparation of this wage bulletin, no responsibility or liability is accepted by Master Builders for the accuracy of the information.
