

BUILDING AND CONSTRUCTION INDUSTRY COVID-19 ALERT

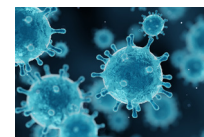

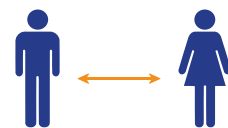

The Victorian building and construction industry is the lifeblood of the Victorian economy, and it remains **safe** and **open**.

We have proactively implemented the most thorough and consistent measures to keep workers safe, as listed in the industry guidelines.

But the threat of illness from COVID-19 and the viability of our industry to remain open is still at **risk**.

COVID-19 INDUSTRY BEST PRACTICE ON SITE

1. Register and use the Victorian Government QR Code Service
2. Ensure that workers who have attended an exposure site or have COVID-19 symptoms stay home, get tested and isolate until they receive further instruction from DHHS.
3. Wear a mask at all times outside of your home, including on-site, unless an exemption applies to you.
4. Audit the ventilation in high-risk spaces, such as hoists, toilets, lunchrooms and change rooms.
5. Comply with the density quotient of one person per four square metres and make sure COVIDSafe cleaning processes and hygiene standards are in place.
6. Follow the COVID-19 industry guidelines.

Thank you for doing the right thing, keeping workers safe and our industry open.

Authorised by Michael Paynter, Industry Liaison Officer, on behalf of the Victorian Building & Construction Industry COVID-19 Taskforce. 4 June 2021.
