HOW WILL I LEARN?

This course is delivered utilising our unique combination of classroom style learning, feedback workshops and a simulated building site. Participants assume a site leadership role and are given the opportunity to practice and apply newly learnt skills and knowledge when confronted with everyday challenges and personalities experienced on site.

Learning is reinforced and enhanced in our simulation sessions with a team of highly trained specialist actors. Participants are given the opportunity to negotiate, problem solve, communicate and provide direction to site personnel, management and subcontractors. In our safe learning environment, participants will be challenged to demonstrate effective consultation and communication techniques, the ability to motivate others and become influential leaders for your organisation.

DEBRIEFING SESSIONS

Each simulation is monitored by a team of trained observers and followed by a facilitated debriefing session. Here participants are able to exchange their experiences and individual feedback is provided by the observers.

Participants discover that there are many ways to approach each interaction or challenge and how their actions influence onsite outcomes. Participants will become aware of their development areas having the opportunity to practice, refine and ultimately implement onsite.

BLSC participants will develop the skills to effectively reason and problem solve, consult for more effective outcomes and motivate others to work safer and more productively for your organisation.
