

Demolition is considered high risk construction work (HRCW). As demolition is HRCW, the production of a SWMS is mandatory by the employer carrying out demolition. There are specific requirements for demolition which extend beyond OHS requirements (such as building laws and regulations).

This form will provide subcontractors and principal contractors with a tool to assist them to take the necessary steps prior to demolition. The form allows for permits and certificates to be attached and submitted to the principal contractor.

Action required			Comments	
Demolition permit* has been obtained.	yes	no	NA	
 Attach demolition permit.				
Hazardous materials survey (HAZMAT) has been conducted.	yes	no	NA
