

Sector Group Committee Candidate

Michael Clemenger

GENERAL CONTRACTING NOMINEE

Michael Clemenger **Built Environs**

Dear Members,

I have 27 years' experience in our industry. My involvement with Master Builders Victoria goes back to 2010 when I was elected on the General Contracting Sector Group Committee and in 2011 I joined the Council of Management. I served on the board from 2015-2020 in various roles including Treasurer and Deputy President.

I have been a strong supporter of Master Builders Victoria for over 10 years, putting my own time into our association because I believe very passionately in our industry. The organisations that I have led have always supported Master Builders Victoria, whether it be by regularly attending industry breakfasts or by nominating our projects for awards.

Master Builders Victoria has always held critical relationships with government and an ability to influence. Never has this been so forefront of our minds than through the current pandemic. Our executive has done an incredible job since March advocating for our industry like never before which has kept our industry going whilst others have closed down. I think it is wonderful to see so many nominations from our Sector Group. In years past, we would battle on occasions to have a forum for our Sector Group Committee meetings, so it is very heartening to see such interest in fellow members willing to put their time in for our association.

I have a collaborative and non-adversarial working style regardless of whether I am working with clients, subcontractors, consultants, or my peers in the industry. I would love to continue my contribution to our industry and to our association and ask that you vote for me.
