

# Safety Essentials

## RESIDENTIAL

Your online OH&S resource  
when you need it,  
where you need it!

Master Builders Victoria is pleased to announce that we have partnered with WorkSafe Victoria to provide additional support to residential builders through a new, user-friendly, online portal.

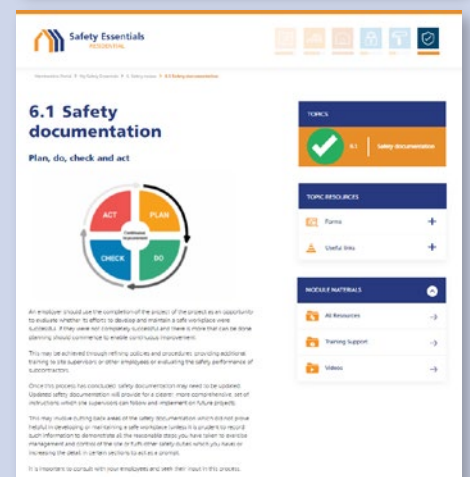

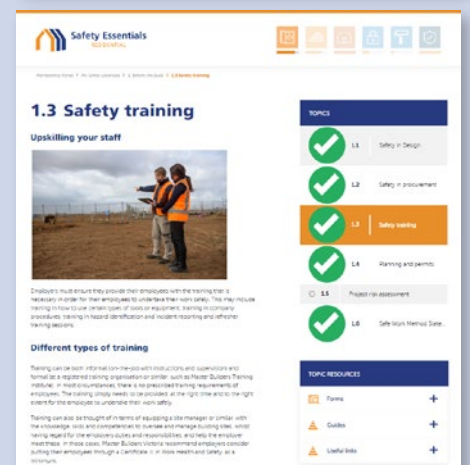

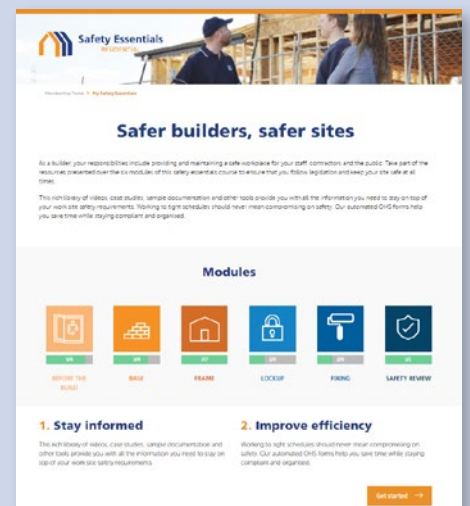

The Safety Essentials Residential Training Portal is a subscription-based service and is FREE to residential builders.

This new interactive portal is designed to support Victorian residential builders with important information on workplace safety and to help them understand their key legal OHS obligations and risks, throughout all critical phases of building/construction.

It will provide an educative experience for builders to identify and manage the critical risks presented throughout a domestic building project.

**SIGN UP:** To subscribe, visit our website and add your subscription to the online shopping cart, which will take you through the subscription process (you will not be charged/billed for this service).

For more information, phone **(03) 9411 4555**.
