

Work on or adjacent to roadways is high risk construction work. A traffic management plan should be included in preparation for construction at a site. Use this checklist to aid in covering all aspects of the plan. Flags denote further action required such as a traffic management plan and SWMS register.

Traffic assessment	yes	no	NA	Flags & comments
Construction site is adjacent to or on a freeway or arterial road.				
There is a risk of traffic colliding with workers on construction site.				
There is a risk of construction vehicles (supplies and machinery) colliding with public road traffic or pedestrians.				
 Mandatory VicRoads pre-qualified company required. 				
Traffic management company holds a current pre-qualification registration from VicRoads.				
Traffic management plan has been created.				
Traffic Management risks added to SWMS
